

Cauda Equina Syndrome Important Information

Cauda Equina Syndrome Warning Signs

Many patients have a combination of back pain, leg pain, leg numbness and weakness. These symptoms can be distressing, but do not necessarily require emergency medical attention.

A rare, but serious back condition, Cauda Equina Syndrome, can lead to permanent damage or disability and will need to be seen by an Emergency Specialist Spinal Team. Some warning signs of Cauda Equina Syndrome are as follows:

- Loss of feeling/pins and needles between your inner thighs or genitals
- Numbness in or around your back passage or buttocks
- Altered feeling when using toilet paper to wipe yourself
- Increasing difficulty when you try to urinate
- Increasing difficulty when you try to stop or control your flow of urine
- Loss of sensation when you pass urine
- Leaking urine or recent need to use pads
- Not knowing when your bladder is either full or empty
- Inability to stop a bowel movement or leaking
- Loss of sensation when you pass a bowel motion
- Change in ability to achieve an erection or ejaculate
- Loss of sensation in genitals during sexual intercourse

**Any one or
combination
of these
